

UNIVERGE® SV8000 Series Communication Analyst

Fulfilling the promise of UNIVERGE®360

UNIVERGE SV8000 Series Communication Analyst enables you to improve your company's level of service and increase your Return on Investment (ROI) with the information it provides.

Communications Analyst is an easy-to-use, graphically-oriented software package that captures, monitors, and analyzes phone calls and trunk usage for single or multiple locations. It provides a clear picture of voice and network activity on converged communication systems such as IP, hosted PBXs and hybrid telephone systems. For both the SMB and enterprise, it enables productivity measurement, cost management, toll fraud monitoring and billing creation.

At a Glance

- Analyze call traffic
- Access reports from anywhere
- Measure campaign response
- Receive instant notification of emergencies and fraudulent activity
- Provide accurate billing and proof of calls

Because it is a scalable solution, with uncomplicated licensing and upgrades that are simple to implement, it can grow as your business grows. Its enterprise-level database standards ensure that your company will never outgrow it. Data can be centralized from multiple phone systems and locations with simple, easy reporting across the network.

Communications Analyst even integrates seamlessly with most Property Management Systems (PMS). Those in the hospitality industry will find its customer billing features especially useful.

Analyze Call Traffic

Use Communications Analyst's Traffic Analysis features to reduce costs and increase revenue by enabling your business to efficiently allocate resources, eliminate excess trunk capacity and increase productivity. Traffic Analysis provides the ability to document and understand trunk usage. It tracks incoming and outgoing trunk calls in real time and provides information that provides a clear understanding of telecom infrastructure use. It even provides "What If?" analyses that demonstrate the outcome of adding and removing trunks on the system. With Communications Analyst, users can optimize trunk usage, eliminate unused capacity and maximize efficiency.

An additional feature enables users to monitor employee productivity by viewing and analyzing call activity. Problem areas can be quickly identified and can be addressed with training geared to specific inefficiencies.

Access Reports from Anywhere

Web reporting enables users to access reporting data from anywhere using just a web browser and internet access. Managers can monitor agent productivity and make adjustments to increase profitability even while they are away from the office. Communications Analyst can automatically e-mail daily call reports to representatives about each department's performance against its goals.

Measure Campaign Response

Campaign Manager tracks and measures response to specific campaigns by associating their performance with specified call traffic. It provides information about the number of calls a campaign generates and helps companies optimize their marketing budgets. This functionality provides critical help to retail, real estate and other businesses that run marketing campaigns.

Receive Instant Notification of Emergencies and Fraudulent Activity

Communications Analyst provides increased security features for its users. Security Alert detects defined emergency and/or fraudulent calling patterns and generates alerts via email, pager or screen pop when the defined criteria are met. The resulting increased security prevents phone abuse and unauthorized calls while helping maintain a safe environment.

Provide Accurate Billing and Proof of Calls

Client Matter associates group contacts with specific projects and generates billing reports for all calls made to and from these contacts for the associated project. Contacts can be imported or exported between email programs and Communication Analyst, and hourly billing rates can be associated with those contacts. Using this feature and its reports, businesses can ensure that they are providing precise customer billing and that they have proof of all calls billed.
